

Tools and tricks to create study materials

Helpful steps and tools, especially for neurodivergent students, to use for studying difficult content

Study Guide Tools and Steps

- Use digital resources; download transcripts from past lectures to create a study guide
- Use AI tools to create a study guide from the transcript
- Additional methods can use the study guide for learning styles that help with understanding and retaining information

- Writing out notes from the study guide document

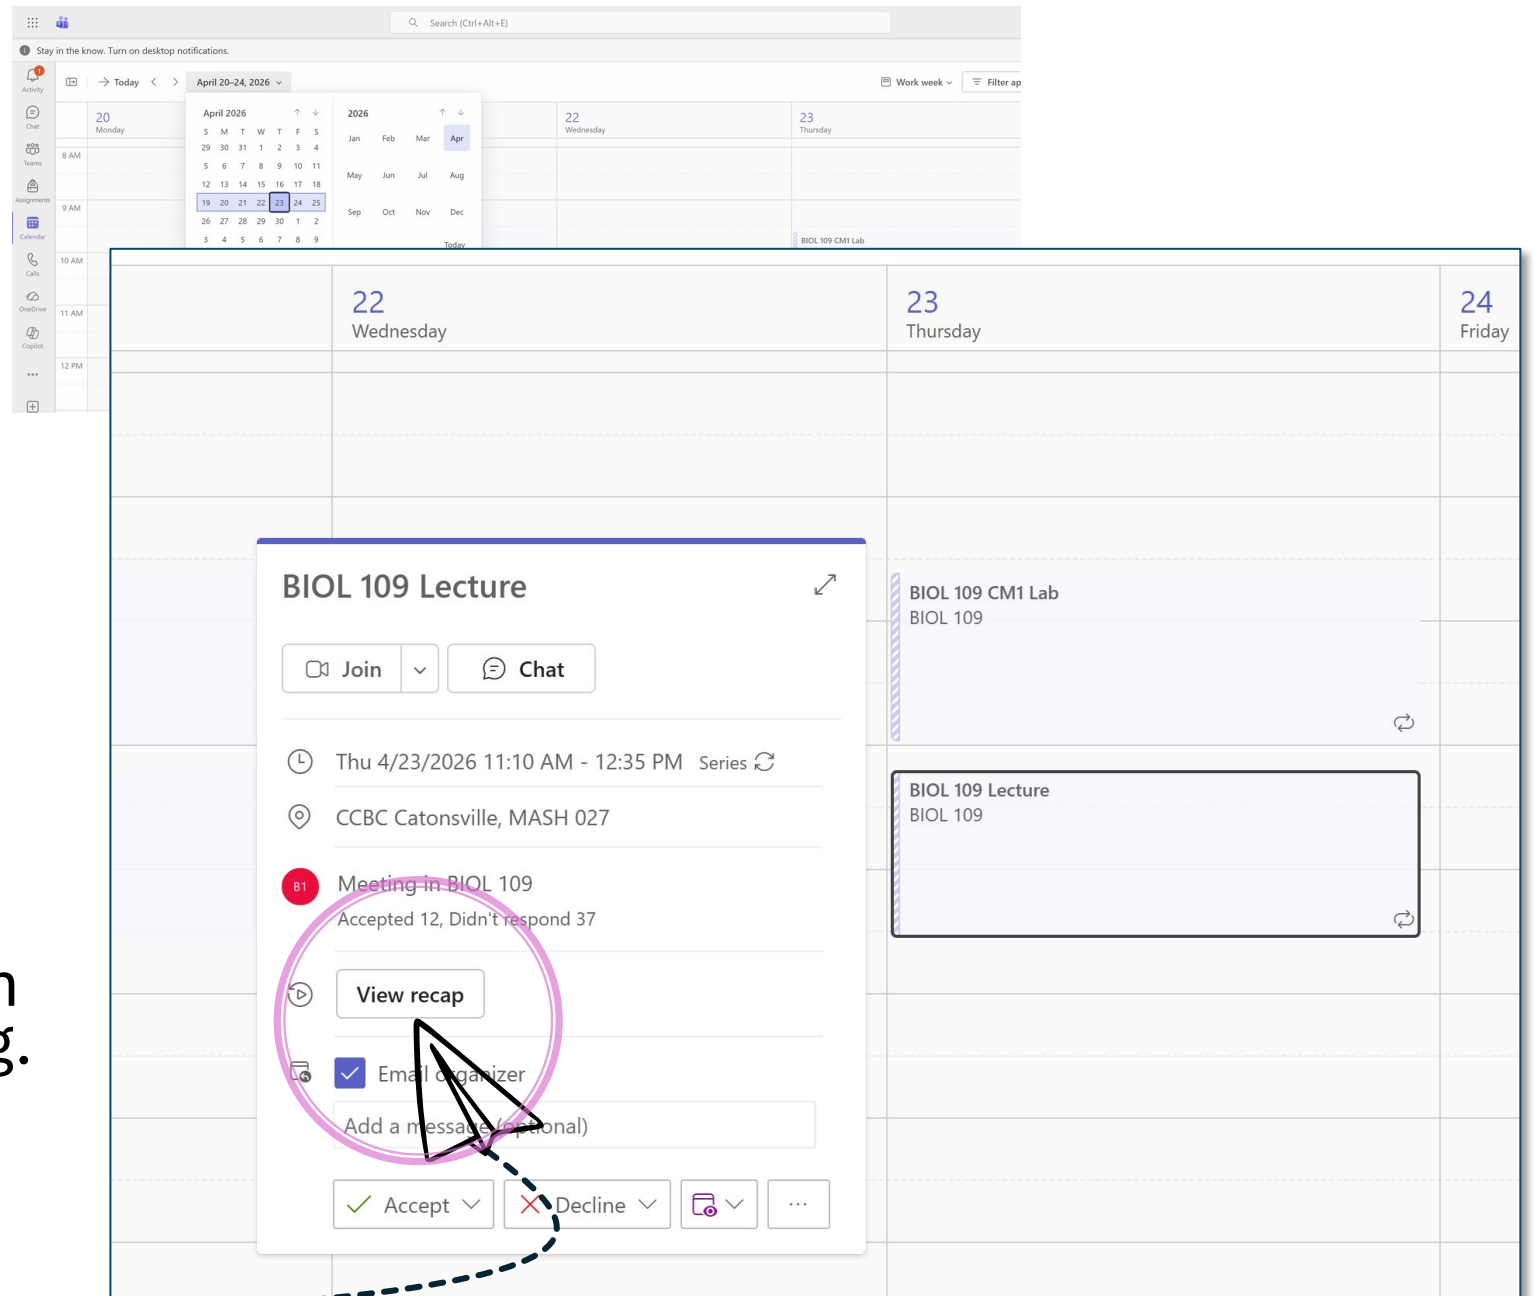

- Listening to the notes with screen reading apps

- Drawing notes from the audio and/or softcopy of the notes can help to create a custom visual learning guide

Using digital resources

1. Download the transcript from the recorded teams recap
2. Navigate to the date on Teams calendar and select the meeting block.
3. A window will pop up with details about the meeting. Click on the words “View recap”

Downloading the transcript

1. The meeting recording will appear. Navigate to the right of the video image and click on the word Download.
2. In the dropdown menu, select Download as .docx file

The screenshot displays a Zoom meeting window. On the left, a presentation slide titled "Nephron Physiology" is visible, featuring diagrams of filtration, reabsorption, and secretion in a nephron. The main video area shows a participant's face. On the right, the "Transcript" panel is open, showing a list of messages. A pink circle highlights the "Download" button in the transcript panel, and a black arrow points to the "Download as .docx" option in the dropdown menu. The "Shared files" section at the top right lists several documents, including "Effects of Rigor Mortis Slides.pptx" and "BONE REMODELING PRESENTATION.pptx".

General

Thursday, April 23, 2026 11:10 AM - 12:35 PM

Shared files

- Effects of Rigor Mortis Slides.pptx
- BONE REMODELING PRESENTATION.pptx
- How stress affects the body (fight or flight response).pptx

Should...

This...

You wanna see?

Okay.

All right, so let's start with announcements.

So, I...

sent out a few announcements recently. The major...

Focus of those announcements were on the assignments.

I...

There's one assignment where it basically says what the plan is for the rest of the classes that we have.

Processing the transcript file

1. Open the downloaded transcript .docx file and edit or delete any superfluous text
2. Run the file through an LLM with a prompt like “create a study guide from this file”
3. After copy and pasting the generated content into Word, edit the file to provide additional visual aids, such as adding color to alternating table rows to help break up multiple rows of text

The diagram illustrates the three-step process of processing a transcript file into a study guide. It features a Microsoft Word document titled "BIOL-109-Lecture-Transcript-April-23,-2026.docx" and a Google Docs interface.

Step 1: The Word document is open, showing the transcript text. A pink circle with the number "1" is placed over the document title.

Step 2: The transcript text is pasted into a Google Docs document titled "final-notes-bio-109.docx". A pink circle with the number "2" is placed over the document title.

Step 3: The content is copied into a Word document, which is then edited to include a table. A pink circle with the number "3" is placed over the table.

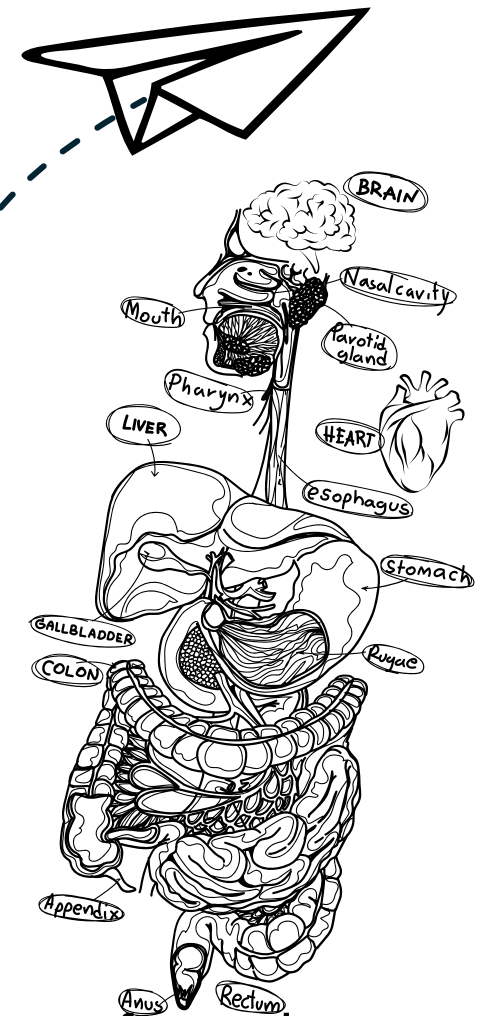

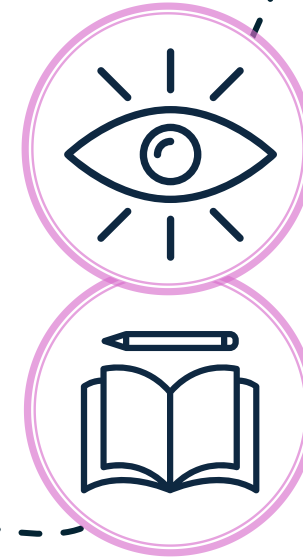

The table is titled "1. Reproductive System" and "Male Reproductive System". It is a table with 2 columns: "Structure" and "Function". The table content is as follows:

Structure	Function
Testes	Produce sperm + testosterone
Epididymis	Sperm maturation/storage
Vas deferens	Transports sperm
Seminal vesicles	Add fructose-rich fluid to semen
Prostate gland	Adds activating fluid
Penis	Delivers sperm

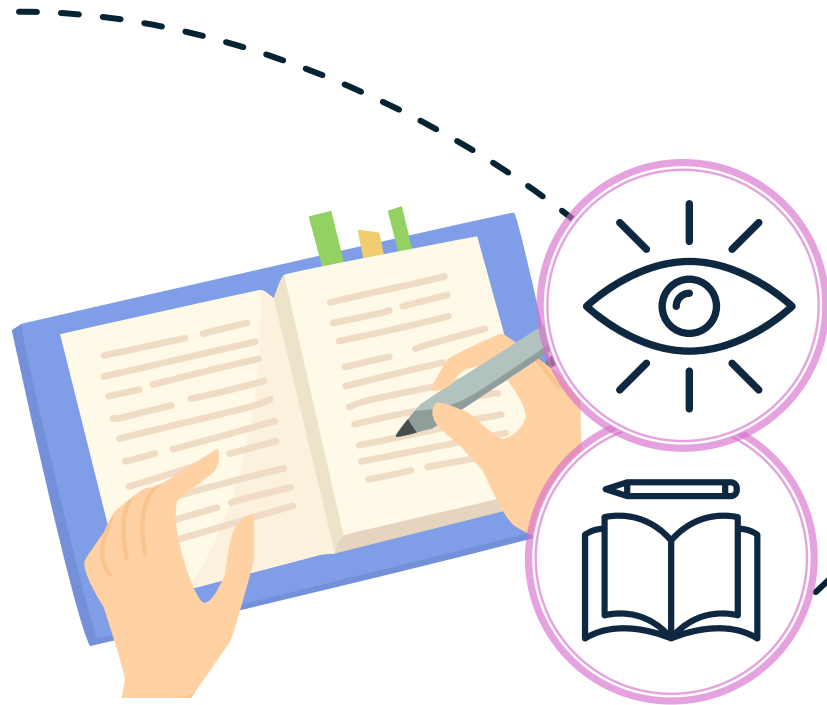

The table is styled with alternating blue and white rows. A color palette is visible on the right side of the Word document, showing various color options for the table.

Additional methods for learning styles

Listening to the notes with screen reading apps

Drawing notes from the audio and/or softcopy of the notes can help to create a custom visual learning guide

Writing out notes from the study guide document
